

Code changes to the schools SEN register

With the introduction of the new SEN code, all students will need to be reassigned on the Schools SEN register. This process will automatically be undertaken by the school.

Despite some students being removed from the register, as they will no longer need to be coded, students will continue to receive the same level of additional support as is necessary for them to fulfil their potential at PV. However, in order for students' needs to be identified correctly under the new code from September 2014, if your child is currently on the register, their need will be logged under a different code. For example, as Educational Statements are in the process of being converted to Educational Health Care Plans, once completed those students currently coded under **S** will be coded on the schools SEN register under **EHCP**.

To incorporate such changes, the schools SEN Policy is currently under review and will be made available for a 2 week consultation period with parents in the coming year.
